AEON CO., LTD.

Aeon continues to plant trees in order to pass down the water and greenery planet Earth to the future.

**The number of trees that Aeon and customers have planted will exceed 10 million this year**

Since 1991, Aeon has conducted tree planting activities with customers, and the number of trees planted will exceed 10 million this year. A total of about 1 million people have participated in the "Aeon Hometown Forests Program" under which trees are planted on the premises of Aeon stores and other tree planting initiatives sponsored by the Aeon Environmental Foundation.

Nowadays, with the world's forests being destroyed due to natural disasters, economic activities, etc., harmonious coexistence of nature and humans is the global challenge. Regarding the 21<sup>st</sup> century as the century of the environment, Aeon has conducted tree planting activities inside and outside Japan for more than 20 years.

"Aeon Hometown Forests Program" is an activity conducted mainly by Aeon Group employees and customers, aiming at making Aeon stores rooted in the local area and become a verdant place for relaxation. Starting with JUSCO Malacca Store, Malaysia (present Aeon Malacca Shopping Center) in 1991, Aeon has planted trees that are native to the region on the premises of newly opening stores. A lot of children have participated in these tree planting activities, and the trees, just like those children, have grown tall to form forests that are loved by local residents. At the time of the Great East Japan Earthquake, "Aeon Hometown Forests" of some stores blocked the floating materials from Tsunami, and mitigated the damage.

Aeon Environmental Foundation, founded in 1990, has hosted tree planting initiatives mainly in Japan, China and ASEAN nations, aiming at the restoration of forests damaged by natural disasters, etc. It has implemented the Great Wall Tree Planting project in Beijing from 1998 to 2010, in which a total of 15000 volunteers from Japan and China have planted about 1 million trees in total.

This year, under the slogan "10 million trees with customers," Aeon will express appreciation for the cooperation so far and conduct projects that will make more people aware of the importance of nature. Starting with the tree planting festival held at Aeon Mall Tsukuba on Sunday, March 3, various projects will be implemented outside and inside Japan all through the year.

Aeon continues to plant trees with local residents, in order to pass down the beautiful water and greenery planet Earth to the children who will lead the next generation and to the generations far into the future.

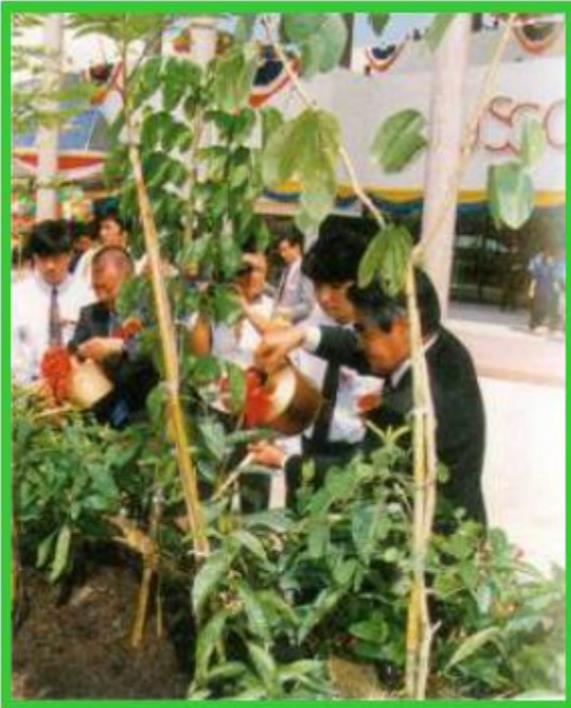

**[Number of trees planted by nation]**

(As of February 28, 2013)

[Tree planting efforts by Aeon Group]
